

Yash Kumar Sharma

Full-Stack AI Engineer | Cybersecurity Developer | IoT Systems Builder

Bulandshahr, Uttar Pradesh | yash1047sharma@gmail.com | +91-7078479889 | github.com/indeed654 | linkedin.com/in/yash-sharma-914641326

Summary

Full-stack AI engineer building production-ready systems across AI, cybersecurity, IoT, cloud, and backend engineering. Strong in TypeScript, React/Next.js, Python, Java/Spring Boot, Docker, RAG workflows, and practical architecture communication.

Core Skills

AI: TensorFlow, PyTorch, LangChain, Transformers, RAG, vector search. Full-stack: Next.js, React, TypeScript, Node.js, Spring Boot, REST APIs, Tailwind. Cloud/DevOps: Docker, Kubernetes, AWS, Azure, GCP, Vercel. Security/IoT: OWASP, IDS/IPS, threat intelligence, MQTT, ESP32.

Experience

Software Developer Intern - AtDrive - Jun 2025 - Aug 2025

- Built Java/Spring Boot backend services and REST APIs.
- Worked with Docker, Kubernetes deployment practices, and MySQL optimization.
- Contributed to enterprise applications designed for 10k+ users.

AI Intern - Exponentia.ai - Jan 2025 - Mar 2025

- Improved ML pipelines through preprocessing, feature engineering, and evaluation loops.
- Worked on predictive modeling workflows using Python and scikit-learn.
- Prepared structured datasets and reproducible experiment notes.

Engineering Projects

Autonomous Multi-Agent Cyber Defense System | Python, TensorFlow, LangChain, FAISS, FastAPI, Docker

- Built anomaly detection and CVE retrieval workflow with explainable response planning.
- Separated detection, retrieval, and response agents for testability and lower operational risk.

Smart Home Automation | ESP32, Firebase, React Native, MQTT, Node.js

- Designed device-to-cloud control plane with desired/reported state handling.
- Used MQTT for low-latency commands and Firebase for state sync and preferences.

Decentralized IP Registry | Solidity, React, Web3, IPFS, Hardhat

- Implemented wallet-based ownership registry with on-chain metadata references.
- Moved large payloads to IPFS to reduce gas cost and improve auditability.

Education

B.Tech Computer Science (IoT), AKTU, 2023-2027 - focused on distributed systems, IoT, cloud engineering, AI workflows, and security fundamentals.

Certifications

BCG GenAI Job Simulation; Deloitte Cyber Simulation; Accenture Data Analytics; Data Science Job Simulation; Data Analytics & Visualization; Microsoft Generative AI Productivity Skills
